

Bona® Atomic Van

The innovative concept of the van-mounted Bona Atomic Dust Containment System means having a more powerful system, providing evacuation of the airborne dust that is generated from the entire sanding process.

- Ideal for hard to access commercial jobs
- Dramatically more powerful system, providing evacuation of airborne dust.
- Powered by a fuel efficient, 29-HP electronic fuel injected water-cooled Kawasaki engine outside the home or business.
- 200 ft. 2" and 100 ft. 1.5" non-marking hose connects the sanding machines to the dust collection system in the van.
- 15 ft. 1.5" non-marking hose with detailing end attachments.
- Perfect system to advertise your business. Your van can be customized with your company name, logo, phone number, and website plus your choice of a full-color photograph.
