Dust-free Sanding

The health and safety of our craftsmen and floor owners is a priority at Bona. That's why we have developed the Bona Dust Care System (DCS), a powerful tool for completely dust-free sanding.

- Healthier working conditions
- Totally sealed system
- Unique separation process

Silver Treatment

Bona Silver Treatment

Bona Floor Treatment Program

Silver Treatment

Restore for a longer floor lifetime

Bona Floor Treatment Program consists of 3 different treatments depending on the condition and use of the floor: Gold, Silver and Bronze.

When the top layer of a wooden floor's protective surface is slightly stained or showing light scratches, the Silver Treatment can effectively restore its original beauty. It is an excellent alternative to a full renovation, with less downtime and cost.

High-performance Bona Diamond Abrasives are used to prepare the surface by removing scratches and wear. The perfectly smooth sanded surface can then be recoated with Bona Traffic HD, giving the floor a new layer of durable protection with perfect adhesion to the layer beneath.

Restoring the floor's beauty and prolonging its lifetime is now an overnight job!
