TO PROMOTE
YOUR BUSINESS

Bona® Atomic Van

Effective dust containment is essential for protecting your health and is a competitive advantage for your business. If you can't provide that, most likely one of your competitors can. Bona's innovative dust containment systems eliminate dust throughout the home, providing healthier working conditions for you and your crew.

There is also no time consuming hanging of plastic or costly clean-up, so you are happier and so are your customers. The innovative concept of the van-mounted Bona Atomic Dust Containment System® means having a more powerful system while providing evacuation of the airborne dust that is generated from the entire sanding process.

Over \$10,000 in savings with Bona's Fleet Discount!
