

Bona Commercial System™ Abrasion

Using the Bona® Abrasion System gives your damaged and worn-down hardwood and resilient floors a new lease on life with our innovative recoating process. Thanks to our streamlined approach, the perfect surface can be achieved in a matter of hours with little downtime, is cost-effective, and allows you to transform your client's floor instead of dealing with the hassle of installing a new floor. The Bona Abrasion System is compatible with hardwood and resilient floors, which involves abrading with Bona Diamond abrasives and Bona FlexiSand DCS® buffer, followed by our professional grade finishes for a durable and beautiful floor.

Bona's abrasion system consists of:

- Bona FlexiSand DCS® Buffer
- Bona DCS® Back Vac
- Bona® MultiDisc
- Bona® Diamond Abrasives
