

Bona Commercial System™ Color Chips

Technical Data Sheet

Achieve unique and beautiful design elements when renovating your resilient floors with Bona Commercial System™ Color Chips. They can be added in various concentrations depending on your desired look. Offered in 10 base colors and 5 premium color options to provide an infinite number of custom color combinations.

- Adds beauty and depth to resilient floors
- Easy to apply
- No additional time applied during coating process

Technical data

Physical Characteristics:

Ingredients – Barium sulfate, calcium carbonate, proprietary resins, titanium dioxide, pigment(s)

Color – Black, White, Neutral Gray, Medium Gray, Ivory, Beige, True Blue, Heaven, Moss, Lipstick Red, Schist Stone, Kona Beige, Rose, Maui Blue, Silver Mica

Dry Film Thickness Gauge - ~ 5 mils

Solids – 100%

Shape – random

Size – ¼"

Gloss Level (60°) – <15 units

Odor – odorless

Materialism - Nonmetameric

Packaging – 5-pound bag (1-pound bag Mica only)

Application Characteristics:

Application Tools – Hand

Coverage – 50-200 square feet per pound*

**depending on desired coverage*

Recommended Use

- Use together with Bona Commercial System Resilient Base Color(s) and Bona Commercial System Resilient Floor Finish
- VCT, linoleum, PVC, LVT and rubber floors
- At schools, healthcare facilities, retail spaces and commercial buildings

Directions

BEFORE USING, READ ALL DIRECTIONS AND SAFETY DATA SHEETS. KEEP OUT OF REACH OF CHILDREN.

FOR TECHNICAL ADVICE: Call Bona US at 800-872-5515

NOTE: The Bona Commercial System Color Chips are to be used together with Bona Commercial System Resilient Base Color(s) and Bona Commercial System Resilient Floor Finish. Read all back-label content for each product before application.

CHIP APPLICATION: The chips are to be added during the base color application process and must be added while the base color is wet. Work in small sections, approximately 3' x 3' and distribute chips by hand. Grab the desired amount of chips and gently disperse chips in an upward motion, allowing the chips to fall within the 3' x 3' area. Ensure there is a 12" to 18" wet base color line where chips are not dispersed. This wet line will allow overlapping of base color and chip coverage of the next floor section. Distribute desired amount of chips.

NOTE: if a second coat of base color is needed, chips are to be applied in the second coat of wet base color.

Finishing

Bona®

Bona Commercial System™ Color Chips

Technical Data Sheet

Maintenance

Storage – store in air tight poly bag in a dry environment at room temperature to avoid moisture, humidity and product damage.
