

## Bona Printed Floor UV

Enhances the performance and looks of  
printed floors

**Bona**<sup>®</sup>

---

Worn images can expose the economics of printed flooring products relatively quickly. Bona Printed Floors is our solution, increasing resistance to preserve the wood effect and extend your floors lifespan.

Printed floors enable more people to enjoy the look of wood or visual effect without paying its premium price. However, the economics of the product can be laid bare when the image degrades relatively quickly with wear. The solution is Bona Printed Floors, which provides extra protection to keep printed floors looking fresh and smart for longer.

Bona Printed Floors is an easy-to-run, cost-saving system. It applies a protective coating with excellent adhesion and the correct surface tension for the particular print. It confers high physical and chemical resistance, of course. A range of gloss levels is available to suit all kinds of surfaces, required protection levels and tastes.

With no possibility of renovation, budget printed floors are at the mercy of time. Bona Printed Floors can transform these products into a more economically viable purchase.

- Improves resistance
- Extends lifetime of printed floors
- Choice of protection and gloss levels
- Excellent chemical resistance
