

Bona Traffic UV

A premium look with high resistance

Bona[®]

Wear is a constant challenge in high-traffic environments. When you've achieved the premium look with a wood parquet floor, Bona Traffic protects it with a high-resistance transparent finish.

Combining a premium appearance with exemplary wear resistance is a constant challenge in high-traffic environments such as restaurants, hotel lobbies and airports. The answer is Bona Traffic, our high-resistance, transparent finish for wood parquet floors. It shrugs off wear and scratches, without masking the premium qualities of the parquet or its prestige "finished on-site" look.

Three gloss levels – matt, silk matt and gloss – are available. You can also combine Bona Traffic with our colour finishes, enabling you to fine-tune the finish to harmonize with the design aesthetics of each setting. In long-term use, floors treated with Bona Traffic are easy to maintain.

Bona Lifetime Support is available worldwide with a full range of products and services.

Resistance, aesthetics, easy care: it is no surprise that Bona Traffic is the first choice among architects, specifiers and designers for many demanding environments.

- High resistance to wear, scratching and chemicals
- Long lasting premium look
- Easy maintenance, compatible with Bona Lifetime Support
- Transparent surface, maintains the natural beauty of wood
