Part of the Bona Home wood floor renovation system
**Bona Home Wood & Maintenance Oil**

- Highly stain-resistant
- Water-repellent
- High yield
- Easy to apply

BONA HOME WOOD & MAINTENANCE OIL for impregnation/initial treatment of raw wood floors and/or continuous maintenance of oiled indoor wood flooring. High in oil, low in solvent content. Easy-to-apply formula with outstanding impregnation qualities. For matt surfaces and intense wood colour.

---

**STEP-BY-STEP SYSTEM**

**Bona Home Wood & Maintenance Oil**

**Preparation:**
Sand the floor down to the raw wood. The surface must be dry and free of sanding dust and other contaminants.

**Application Initial Treatment:**
1. Apply a thin coat of oil to the floor using a stainless steel spatula or a rubber strip (white).
2. Allow the oil to be absorbed for 15-20 minutes, and remove surplus oil using cotton cloths.
3. Leave to dry for approx. 12 hours.
4. Apply a second thin coat of oil for best results and a more resilient surface. Remove excess oil after 15-20 minutes and dry the surface thoroughly. Leave to dry for approx. 24 hours before subsequent use.

** WARNING:** Bona Home Wood & Maintenance Oil contains drying oils. Risk of spontaneous ignition. Only store soaked rags, cloths, pads and the like in closed containers or in water.

**Care:**
Clean the surface with Bona Cleaner for Oiled Floors, then leave the floor to dry thoroughly. For coloured oil surfaces, use Bona Wood & Maintenance Oil of the same colour to freshen up worn areas.

1. Apply a thin coat of oil to the floor using a stainless steel spatula or a cotton cloth.
2. After 15-20 minutes, remove excess oil with cotton cloths and dry the surface thoroughly.
3. Leave to dry for approx. 12 hours.

** WARNING:** Bona Home Wood & Maintenance Oil contains drying oils. Risk of spontaneous ignition. Only store soaked rags, cloths, pads and the like in closed containers or in water.
