

Bona DCS[®] 50

High-powered, heavy-duty, commercial vacuum

Bona DCS 50 is a lightweight, efficient, and versatile vacuum that can be used when sanding both wet and dry surfaces for a dust-free environment. It's compact enough that it can easily be carried upstairs or maneuver in hard-to-reach or tight areas. The overall performance, sleek design, as well as new and improved features of this unit have added benefits that will provide contractors with a general all-purpose vacuum that can be used from installation through the final job site vacuuming.

- 13.5-gallon (50L) with wet & dry vacuum capabilities
- Designed for use with or without a vacuum bag.
- Equipped with 120V electrical outlet with automatic start/stop for power tools.
- Automatic filter cleaning
 - ❖ Time intervals - Off/15sec./60sec.
 - ❖ HEPA certified filtration efficiency of 99.9% (M Class)
 - ❖ Quick/easy filter access
- Quick connect attachments and integrated accessory storage.
- Extremely quiet vacuuming experience (69dBa)

Bona DCS[®] 50

High-powered, heavy-duty, commercial vacuum

The DCS50 must be equipped with the Flat Pleated HEPA Filter and the Fleece Filter bag to be HEPA Certified. All other configurations are not considered HEPA and should **NOT** be used on jobs requiring these specifications.

HEPA Certified	Non-HEPA Certified Option 1	Non-HEPA Certified Option 2
- Flat Pleated HEPA Filter - Fleece Filter Bag	- Candle Filter - PE Disposal Bag	- Flat Pleated HEPA Filter or Candle Filter - No Bag

	Fleece Filter Bag - Highest level of filtration - For dry applications only - Best for vacuuming wood dust - Minimizes clogging of pleated filter. - Extends the life of the filter. - HEPA Certified when used with Flat Pleated PES/HEPA Filter
	PE Disposal Bags - For wet and dry applications - Can be used for wet or dry applications. - No filtration → just for disposal
	Flat Pleated HEPA Filter (factory installed) - For wet and dry applications - Allow to dry completely when switching between wet and dry applications. - HEPA Certified when used with the Fleece Filter Bag

Bona DCS[®] 50

High-powered, heavy-duty, commercial vacuum

Candle Filter (Can be installed in place of the Flat Pleated HEPA Filter)

- For dry applications only
- For constantly high suction power.
- Reduces undesired interruptions to work.
- Best used with no bag or with PE Disposal Bag
