

Bona® 1/8" Interface Pads

Help to soften the aggressiveness when sanding and minimize dishout

Bona's 1/8" Universal Hole Interface Pads are designed for use with Bona NET sanding discs on 5 or 6" power tools to protect the tools hook & loop and allow for proper dust containment irrelevant of the hole pattern. The interface pads soften the sanding aggressiveness and minimize excessive sanding of the soft grain of the wood surface. In addition, these pads can be used on the Power Drive, MultiDisc, or 6" edgers to protect the hook & loop and provide a softer sanding touch.

- Available in 5" (45-holes) & 6" (103-holes) sizes
- Specifically designed for use with Bona NET abrasive discs when used with power tools.
- Also compatible with the Bona Power Drive, Bona Multidisc and Bona CombiEdge (6" edgers)

Bona® 1/8" Interface Pads
