

Bona[®]

Passion for wood floors

Established in 1919, Bona is a world leading innovator with a unique system for wooden floor treatment. Through subsidiaries and distributors we have local presence in more than 90 different countries enabling us to be close to our customers and craftsmen.

Our long commitment and passion for wooden floors enable us to offer lasting, sustainable results that meet all wooden floor needs for professionals and floor owners alike.

BREAKING BARRIERS IN SANDING

Bona Diamond Blades – Stripping resilient floors

WHAT YOU CAN DO

Wood sanding.
Edge sanding.
Resilient stripping.
Concrete sanding.
Effect brushing.
Buffing & Polishing.

A NEW BREAKTHROUGH FOR RESILIENT FLOORS

Resilient stripping just got better and faster with Bona Diamond Blades. Never content with the present, Bona Flexisand expands in versatility with safe and effective surface preparation of resilient floors. With one versatile machine as basis, you can now prepare and bare strip wooden, resilient and concrete floors as well as create stunning effects through brushing, buffing and polishing.

To speed up the stripping process Bona Diamond Blades is the right choice. The innovative discs enable a fast stripping of resilient floors that is up to 60% faster than standard processes. It enables a safe and straightforward method that is both free of chemicals and that demands less water. Bona Diamonds Blades – breaking barriers in sanding!

- ✓ FASTER
- ✓ EFFECTIVE
- ✓ SAFE AND SIMPLE

BONA DIAMOND BLADES

The World's first Bona Diamond Blades are constructed to not warm up the heat sensitive resilient surface. They are made of wooden pads mounted with diamond coated blades instead of classic abrasive discs. The blades double as integrated cooling fans throughout the abrading process. The stable surface

temperature enables the floor to be abraded without the problem of clogging that normally follows. The unique form and coating mixture of the metal and diamonds G 100 makes it possible to strip resilient floor surfaces without clogging and tedious steps.

A SIMPLE PROCESS FROM START TO FINISH

AN ASTONISHING RESULT

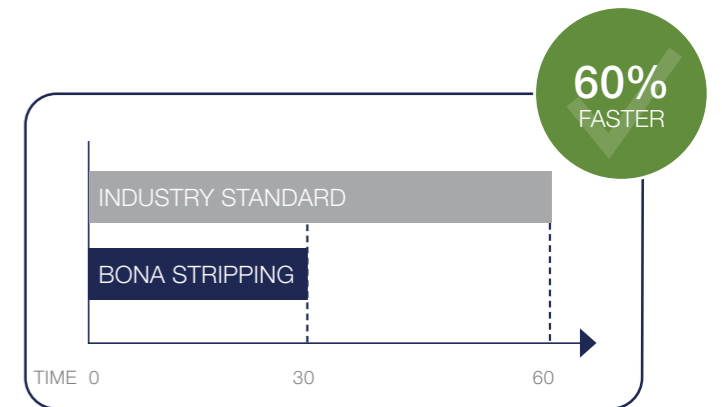

Astonishing results accomplished at Noraplan Rubber, in more than half of the working time than using a traditional stripping

method, using Bona Flexisand mounted with Bona Diamond Blades and a layer of Bona Pure.

FASTER

The innovative Bona Diamond Blades offers a faster stripping process that is up to 60% faster than industry standard stripping processes. Instead of a process of 5-7 hours you can now transform your floor in just 1,5 hours, which saves you both time and money.

EFFECTIVE

It is highly effective and as it demands less water, you as a contractor can secure a longer lifetime of your machine assortment. It provides you with clean conditions and a longer performance thanks to the clogging free stripping that Bona Diamond blades provide.

SAFE AND SIMPLE

A safer way of doing the job compared to the traditional methods. So, you can be sure that all residuals from the resilient floor is removed and without the risk of discoloration. It is a process free from chemicals and is the solution for surfaces which you earlier could not work with and you can be sure that it gets the job done.

UNIQUELY STRAIGHTFORWARD

Each flooring type has its specific character but in general the renovation process is the same. With Bona Diamond Blades and PowerDrive Connect you have innovation of stripping resilient floors in your hands. Which stripping method to choose depends mainly on how and with what

the floor has been maintained with and how thick the build-up of care products is. Bona Diamond Blades offers a chemical free process with less use of water. It enables you to accomplish fantastic results, from clear coat restoration to total transformation.

BONA RESILIENT STRIPPING PROCESS

METHOD 1 – RESTORING A FLOOR (2 HOURS)

Start by evaluating if the floor is able to be renovated. To restore the floor, start by dry sanding with Bona FlexiSand, PowerDrive Connect and Bona Diamond Blades. Use Bona Supraflex around the edges with Bona Net G80. Add water to

the floor and use Bona FlexiSand, Quattro Disc, Bona Net Ceramic G80 . The process only demand 1/3 of traditional stripping. Pick up slurry water with Bona PowerScrubber and leave to dry over night and finish by applying clear coat.

METHOD 2 – TRANSFORMING A FLOOR (1,5 HOUR)

Start by evaluating if the floor is able to be renovated. To transform the floor start by dry sanding with Bona FlexiSand, PowerDrive Connect and Bona Diamond Blades. Use Bona

Supraflex around the edges with Bona Net G80. Use Bona FlexiSand, PadDriver, SandScrad. Finish by adding colour coat.

RESILIENT STRIPPING

EXPANDING YOUR WORK CAPACITY

Bona offers the most comprehensive range of sanding solutions. You will find an entire system of compatible products and solutions that deliver unparalleled performance, allowing you to work with efficiency and speed, without compromising on quality. You can rely on Bona for the best possible selection of tools and products

for the job. With just one machine as basis, you can expand your capacity and be sure that you can be empowered when working with resilient floor. The innovative Bona Diamond Blades enable a simple stripping procedure – as easy as wooden floor abrasion.
